The South-East Regional Action Plan (SAP), Harbours East: Liveable; Sustainable Communities 2015-2020 targets specifically the 15 Councils within the Regional Committee jurisdiction and includes possible strategic Councils adjacent to its boundaries.

VISION

“The South-East Regional Committee (SERC) will seek the means to spur actions to guarantee a sustainable development for future communities. The Councils in partnership will plan, design and develop projects to ensure that the communities within the region are more liveable.”

MISSION

“The South East Regional Committee SERC will try to gather all the resources possible to direct actions to better governance; through better coordination, increased information and communication..."
The South-East Regional Action Plan (SAP) has been compiled in the past months after an internal consultation process. This draft consultation document presents our principles, the SERC vision and mission, the Committee’s aspirations and proposed projects for funding. The South-East Regional Committee is the second Regional Committee in the UN Global Cities Compact to become a member and is currently engaged in becoming a Regional Secretariat.

We are committed as Councillors and citizens to make our communities more sustainable and more liveable. We endeavour to succeed through ‘best practice’ in governance and management and in full cooperation with local businesses and entities.

Chev. Paul Farrugia
President SERC

SOUTH EAST REGION ACTION PLAN (SAP)

The South East Regional Committee (SERC) between 2014-2015 developed an Action Plan for the 15 Councils in the Region with possible cooperation with adjacent Councils.

THE REGIONAL ECONOMIC, SOCIAL AND CULTURAL COMMUNITY PLAN (RESC)

This RESC Plan for the South East Region follows the terms of reference set in the document “Funding Initiative to Regional Committees: Regional Economic, Social and Cultural Community Plan; Guidance Notes (September 2016).” It is set over 7 chapters which cover an evaluation and analysis based on statistical data and diverse diagnostics. The final section proposes an implementation process based of Circles of Practice and presents a comprehensive one-page plan.
SUSTAINABLE URBAN MOBILITY PLAN (SUMP)

The scope of this document is to develop an integrated planning document; a Sustainable Urban Mobility Plan (SUMP) which addresses specifically the needs of the South East Region. The SUMP is directed at resolving the congestion and traffic problem in the South East of Malta through; the application of new traffic management systems, alternative transport systems, the use of new technology to achieve a greener more efficient viable transport.

HISTORIC URBAN LANDSCAPE CONVENTION (HUL PROCESS MAP)

Why is SERC signatory to "The Recommendation Historic Urban Landscape (HUL)"? The HUL supports and propels the objectives and the aspirations of the SERC expressed in the South-East Action Plan 2015. The consultation process was one of the processes to gauge the necessities and priority projects in the development of the SAP. The consultation invited the members, the Councillors, Mayors and the administrative staff of the same councils to give their opinion on various aspects of project development."

PLANNING AND PROJECT BRIEF
Draft Consultatation Project Brief

Prepared for: Kalkara Local Council
Prepared by: Dr Malcolm Borg Director HE Consultancy Ltd.
22 April 2015
Proposal number: KPB-V12015V2

KALKARA LOCAL COUNCIL
The SERC is also in the process of launching its state of the art Reach-Out Centre (ROWSE). Last year a design and planning brief and feasibility study were compiled. At a second stage Architects (MADE Studio) have prepared designs for the Planning Application. The Plan is to develop an active inclusion policy with a space to promote social investment in community development in poorer areas. The multi-use space will be a hub for cooperation between local authorities and agencies and direct efforts to spur innovative economic and social entrepreneurship. It will also offer assistance to access welfare services, promote equal opportunities to vulnerable groups and will target awareness raising and integration for migrate and asylum seekers.

City Scan Report 2015

This report summarises the City Scan submission from Regjun Xlokk - South East Regional Committee, which joined the United Nations Global Compact as a mom-biz participant in 2004.

The City Scan, launched in February 2013 by the Global Compact Cities Programme on Cities Programme, assists cities in the identification of the critical issues they are facing, and helps them recognise and respond to their strategies and initiatives to address these challenges using the lens of the Ten Principles of the Global Compact. It also seeks to identify the strengths of each city and showcase their contribution in ensuring sustainable, equitable and just urban communities.

The survey covers three main categories of municipal activity: City Development, City Sustainability and City Governance. Within these three categories, the cities are required to report on 32 topics areas, broken down further into 157 issues or challenges. The data is collected from across the city or municipal government by the nominated focal point for the UN Global Compact (or another designated staff member).

The City Scan also enables identification of engagement with the UN Global Compact and the Cities Programme and city-led initiatives that influence the business community to have better environmental and social practices.
