**Subject:** Patching Works and Road maintenance  
**Attachments:** Tender for Road Maintenance and Patching 19-02-10 B.O.Q..pdf

Josef,

I have just went through the Tender for 'Road Resurfacing and Patching Works'. I would like to make the following observations:

The most important Sections are Section 3, Section 4, Section 5

Asfaltar Ltd. has most of the rates which are according to the market rates except for Item 1.01, 1.02, 1.06, 2.04, 2.07, 7.02, 7.06, 7.07. This contractor has acceptable rates for Section 3 and Section 4. Asfaltar has high rates for Section 5.

Elle's Urban Services Ltd. has the highest amounts in Section 3, and high rates for the supply and fixing of steel bars. The contractor has also a high rate for the taking up of kerbs (1.05).

Catbros Ltd. has high rates for the excavation of trenches in rock or loose material and excessively high rates for Item 2.06 (Construct storm water gully.) and some items in Section No.4.

Schembri Barbros. Ltd. Excessively high rates Section 4 and Section 5

Polidano Bros. has most of the rates according to the market rates. Needs to clarify **Item 3.08**.

I recommend Elle's Urban Services Ltd., Polidano Bros., and Asfaltar for the winning of the tender. One must note that Elle's has high rates for the footpath work but good rates for patching while Asfaltar has excessively high rates for the patching (Item 5.02, 5.03).

*Polidano*
